

INTRODUCTORY NOTE

This is the first issue of the Union List of Current Foreign Science Serials held in Sri Lanka libraries which SLSTIC plans to update yearly. Compilation of this list was possible because of the ready cooperation of the librarians and staff of the facilities concerned who provided lists or access to facility records of periodical holdings.

1. Scope

This location list of 3103 periodical titles covers the holdings of 50 libraries. Coverage includes titles pertaining to all fields of science and technology excepting the social sciences. The list relates to 1975 receipts; most of the libraries, however, plan to continue subscriptions to listed titles in 1976.

2. Aim

Our primary concern is to provide a useful location guide for (1) the scientific researcher seeking access to current periodical literature, and (2) special libraries attempting to locate titles held in other libraries. The latter group should also find the list useful when deciding on cancellations or placement of new subscriptions.

3. Bibliographic Citation

3.1 Title : Serials, including those issued by corporate bodies, are entered under their published titles, the latest form being used, with the following exceptions:-

- a) all annual reports are entered under Report ...
- b) bulletins, transactions, proceedings are entered under Bulletin...; Transactions ...; Proceedings ... respectively.

When attempting to collate holdings the SLSTIC staff had to contend with, among others, the problem of variant cataloguing practices adopted by cooperating libraries. The World List of Scientific Periodicals (WLSP) 1900-1960, 4th ed, 1963/65; the British Union Catalogue of Periodicals (BUCOP) 1955-1958, and BUCOP Supplements for 1969, 1970-1974 were used as check lists for verification of form of title and place of publication. Where titles could not be traced or where information was insufficient for precise location of place of publication, the periodical titles are cited in the form given by the libraries concerned; these entries carry an*.

3.2 Arrangement of Entries

The titles are arranged in alphabetical order of the important words of the titles with numerals preceding letters. In each letter group, titles carrying initials as full title or first part of title are listed first. Articles are disregarded in the filing order and are not normally shown at the beginning of a title. The style of arrangement follows the WLSR pattern.

3.3 List of Library Symbols

This is a key to the holding libraries indicated by symbols in the Union List. The name, address and telephone number of the facility concerned are given after the symbol.

3.4 Omissions and Errors

SLSTIC requests librarians to send in specific particulars of any omissions and errors.
