

# TABLE OF CONTENTS

	Page
CHAPTER 1	
Introduction	1
1.1 Conducting Polymers	3
1.1.1. Polyaniline (PANI)	5
1. 1. 2. Polypyrrole (PPY)	5
1.2. Clay	7
1. 2. 1 Smectite Minerals	8
1.3 Nanocomposites	10
1.3.1 Nanocomposites Structures	11
1.3.2 Methods of preparation of nanocomposite	11
1.3.3 Studies on polyaniline/clay nanocomposites	12
1.4 Objectives of the Present study	13
1.4.1 <i>In situ</i> and <i>ex situ</i> polyaniline-montmorillonite nanocomposites	13
1.4.2 Polypyrrole-MMT nanocomposites	15
1.4.3 Cu(I)-Polypyrrole-montmorillonite Nanocomposite <i>-In Situ</i>	16
1.5 References	18
CHAPTER 2	
INSTRUMENTION	23
2.1 Electrochemical Impedance Spectroscopy (EIS)	23
2. 1. 1. Equivalent circuit model	24
2. 1. 2. Transmission line model	25
2. 2. Complex Impedance Spectroscopy	26
2.3. X-Ray Diffraction Spectroscopy (XRD)	28
2. 4. Infrared Spectroscopy (IR)	29
2. 4. 1. Fourier Transformed Infrared Spectroscopy (FTIR)	30
2.5. References	31
CHAPTER 3	
EXPERIMENTAL	33
3.1 Exchange of cations in MMT	33
3. 1. 1 Method	33

3.2	Preparation of Anilinium-Exchanged MMT	33
3.3.	Preparative <b>method</b> of Emeraldine Salt-MMT (EMSI-MMT) - <i>in situ</i>	34
3.3.1.	Reloading of Emeraldine Salt to Prepare EMS2-MMT and EMS3-MMT.	34
3.4.	Preparative method of Emeraldine Salt-MMT (ES-MMT) - <i>in situ and ex situ</i>	35
3.5.	Preparative method of series of ES-MMT at different conditions- <i>in situ and ex situ</i>	35
3.5.1.	Ratio (AN+(mol): MMT(g))	35
3.5.2.	Solvent	35
3.6.	Characterization	36
3.6.1.	XRD	36
3.6.2.	FTIR	36
3.6.3.	DC polarization test	36
3.6.4.	Conductivity Measurements	36
3.6.5.	AC impedance	37
3.6.6.	Electrochemical studies of ES-MMT series and EMS-FE series	37
3.7.	Removal of Surface Bound Anilinium Ions by the Excessive Washing Procedure	37
3.8	Preparation of pyrrolium-Exchanged MMT(PR+-MMT)	38
3.8.1.	<i>In situ</i> polymerisation of pyrrolium in MMT	38
3.8.2.	<i>In situ</i> and <i>Ex situ</i> polymerisation of pyrrolium in MMT	39
3.9.	Preparation and characterisation of Cu(II)-exchanged MMT	39
3.10.	Spontaneously polymerisation method	39
3.10.1.	Preparation and characterisation of polypyrrole containing montmorillonite nanocomposite (PPY-MMT) using Cu(II)-exchanged montmorillonite.	39
3.10.2.	Conductivity Measurements	40
3.10.3.	AC impedance analysis	40
CHAPTER 4		
RESULTS AND DISCUSSIONS		41
4.1	Studies of the motmorillonite Clay	41
4.1.1	Characterization of the clay mineral	41

4. 1. 2.	Hydration Studies of cation exchanged MMT	43
4. 2.	Characterization of organically modified montmorillonite	45
4. 2. 1.	XRD Analysis	45
4. 2. 2.	Organophilic and hydrophobic natures of AN <sup>+</sup> -MMT	46
4.2.3.	Nature of AN <sup>+</sup> -MMT with increased anilinium ions	47
4. 2. 4.	FTIR Analysis	47
4.2. 5.	Removal of surface bound anilinium ions	48
4. 3.	Polyaniline /montmorillonite nanocomposite	49
4. 3. 1.	Characterization of EMS 1-MMT hybrid nanocomposite	49
4.3.2.	Temperature dependence of d-spacing of Na <sup>+</sup> -MMT, H <sup>+</sup> -MMT, AN <sup>+</sup> -MMT and EMS1-MMT	51
4. 4.	Polymer loadings.	53
4. 4. 1.	Repetitive introduction of EMS-MMT	53
4.4.2.	Successive Intercalation of EMS and Regeneration the emeraldine salt in MMT	53
4.4.3.	Characterisation of EMS1-MMT, EMS2-MMT, and EMS3-MMT	53
4.4.4.	Structure model for EMS 1 and EMS1- MMT hybrids	53
4.4.5.	Effect of the layer charge of MMT for the arrangement excess polyaniline layers	55
4. 5.	FTIR studies of polymer/layered nanocomposites	56
4.5. 1.	Characterization the form of polyaniline	56
4. 5. 2.	FTIR studies of successively polymer loaded samples (EMS 1-MMT, EMS2-MMT and EMS3-MMT) - Including washing procedure	59
4.6.	Samples Prepared including and excluding Washing Procedure	60
4. 6. 1.	FTIR studies of successively polymer loaded samples (ES 1-MMT (2)) series -Excluding washing procedure	62
4. 6. 2.	Supportive evidence for the decrement of Si-O band intensity due to intercalation of excess polyaniline between layer space of MMT upon successive loading	65

4.6.3.	Effect of AN+(mol): MMT (g) ratio for the Polyaniline-Montmorillonite Nanocomposite	66
4.6.4.	Conformation of oxidation state of PANI III ES-MMT (1),(2),(1/2),(1/2 <sup>c</sup> ) series of nanocomposite	68
4.6.5.	Effect of the medium to prepare well ordered PANI/MMT nanocomposite	69
<b>4.7.</b>	<b>Electrical properties of clay, polymer and clay polymer nanocomposite</b>	<b>69</b>
4.7. 1.	Electrical properties of AN+-MMT	71
4.7.2.	AC impedance analysis of EMS	73
4.7.3.	Electronic nature and Conductivity Measurements of EMSI-MMT, EMS2-MMT and EMS3-MMT	74
4.7.4.	AC impedance analysis of ESI-MMT, ES2-MMT and ES3-MMT	75
4.7.5.	Impedance analysis of kaolinite/polyaniline systems	76
4.5.6.	Dependency of the conductivity with AN+: MMT ratio	77
<b>4. 8</b>	<b>Electrochemical studies</b>	<b>78</b>
4. 8. 1.	Electrochemical studies of successive polyaniline loaded montmorillonite	78
4. 8.2.	Electrochemical impedance analysis	79
<b>4.9.</b>	<b>Polypyrrole/montmorillonite Nanocomposite</b>	<b>84</b>
4.9. 1.	Conductivity and XRD, FTIR characterization of Polypyrrole/montmorillonite (PY-MMT) - including washing procedure	84
4.9.2.	FTIR studies of (PR+-MMT) systems - including washing procedure	85
<b>4. 10.</b>	<b>Conductivity XRD, FTIR characterization of Polypyrrole/montmorillonite (PPY-MMT) - excluding washing procedure</b>	<b>87</b>
<b>4. 11.</b>	<b><i>In Situ</i> Polypyrrole - montmorillonite nanocomposites</b>	<b>90</b>
4. 11. 1.	Spontaneous polymerization (SP) technique	90
4. 11.2.	XRD Studies of CU-PPY-MMT Nanocomposite Materials	91
4. 11. 3.	FTIR Studies	92
4. 11. 4.	Conductivity Studies	94
<b>4. 12.</b>	<b>Factors influence on the SP technique</b>	<b>97</b>

4. 12. 1. Effect of the medium	97
4. 12. 2. Effect of the interlayer cation	98
4. 12.3. Effect of the clay	99
<b>4. 13. Electrochemical studies</b>	<b>100</b>
<b>4. 14. Fabrication of electrochemical cell</b>	<b>102</b>
4. 14. 1. Evidence for the Cuprous ion conducting nanocomposite (Cu(I)-PPY-MMT )	103
<b>4. 15. <i>In situ</i> polyaniline /Fuller's earth nanocomposite</b>	<b>104</b>
4. 15. 1. XRD studies	105
4. 15.2. Electrochemical Studies	106
4. 15.3. EIS Studies	108
<b>4.16. Polyaniline and polyaniline/montmorillonite nanocomposites- Sensors</b>	<b>112</b>
<b>4. 17. References</b>	<b>113</b>
