PREFACE

The first edition of the '*Current List of Scientific & Technical Periodicals in Sri Lankan libraries*' was published in 1998 covering Periodical titles received in major S & T related libraries in the country during year 1998.

The current publication is an update to the first edition & covers periodical titles received in forty five S & T libraries during year 2005. The '*Current List of Scientific & Technical Periodicals in libraries in Sri Lanka*' will serve as a tool for the location of periodical titles in local libraries with a view to promoting exchange of periodical articles to fulfill information needs of scientists. Further, it is intended to optimize the limited financial resources by preventing unnecessary duplication of serials within the country while at the same time ensuring the availability of the most important journal titles in the country.

The co-operation extended by the member libraries in making this publication a success is gratefully acknowledged. The patience & the untiring efforts of Ms. Amila Tennakoon & MS. Hemamali Priyadarshani in the collection of data & the preparation of the publication is very much appreciated. The assistance provided by Mr. Jagath Weerawardena is also thankfully recorded.

The web version of this publication is available on the National Science Library & Resource Centre web site (www.nsf.ac/lk/nslrc) functioning as the on-line consortium of printed journals for the current year. Each title is linked to its web site enabling the user to browse through the Table of contents. Facilities are also provided for on-line ordering of copies of articles from the relevant local library. The publication is also available on CD-ROM format. Any comments in view of improving the publication will be very much appreciated.
