PREFACE.

This is the third in the series of publications brought out as "Documentation Series" by the Sri Lanka Scientific and Technological Information Centre of the National Science Council of Sri Lanka.

This Union List is a precursor to the Union List of Periodicals in Science & Technology which is being compiled by the National Science Council of Sri Lanka. The present publication includes only the Indexing & Abstracting Services and Bibliographical Serials.

All titles are listed under their latest names. The title, place of publication and the date of commencement of the publication is provided. The location and the holdings are indicated. Attempts have been made to indicate the periodicity of the publication, at the time of publication of this Union List.

The arrangement is alphabetical. An index to the abbreviations has also been provided.

A Union List of this nature would facilitate the location of a particular abstracting and indexing service. It indicates the different libraries which subscribe to these and their holdings. In the systematic development of information facilities, such a list is a basic requirement. It creates an awareness of the existing resources and facilitates and promotes coordination.

We appreciate the cooperation extended by the participating libraries, without which the preparation of this would not have been possible.

Ira Unamboowe.
