**THE USE OF MANAGEMENT FRAMEWORKS
FOR THE
ENVIRONMENTAL PROTECTION OF THE COASTAL ZONE**

Report of Research Project conducted by
Dr. S.S.L. Hettiarachchi

of the Department of Civil Engineering
of the University of Moratuwa, Sri Lanka

on a grant made available by the
Natural Resources, Energy and Science Authority of Sri Lanka (NARESA)

Research Assistant for the project Mrs. P. Ratnasooriya

August 1996

ACKNOWLEDGEMENTS

The authors wish to thank the Natural Resources, Energy and Science Authority of Sri Lanka (NARESA) for providing funding for the project and the University of Moratuwa for providing support and assistance in the implementation of the project.

During the implementation of the project the Department of Civil Engineering of the University of Moratuwa was also associated with two projects, supported by the Southern Province Rural Development Project (SPRDP) and the Wetland Conservation Project (WCP) of the Central Environmental Authority. These two projects which were also handled by the authors provided information and data for two case studies thus enabling considerable financial savings with respect to project implementation. The authors wish to thank Mr. T.G. Jayasinghe of the SPRDP and Dr. J. Samarakoon of the WCP for their assistance.

Based on the initial findings of this project the authors forwarded a research proposal to the British ODA for further activities. The ODA is presently conducting investigations on the proposal in order to provide funding for the Government of Sri Lanka for improved Coastal Zone Management. The authors wish to thank the British Council, Colombo for their utmost cooperation.

The authors wish to thank the Director, Coast Conservation Department and his staff and Mr. H.J.M. Wickramaratne of Lanka Hydraulic Institute for their assistance.

S.S.L. Hettiarachchi
