## INTRODUCTION

This bibliography is the result of a request made by participants of a WHO-Sponsored Workshop for Strengthening of the National Nutrition Research Programme, organised by the Medical Research Institute in April, 1988. There has been no documentation of writings on food, nutrition and related topics, although these subjects have been researched on for over a century. Many of the present-day researchers are unaware of what has been done before. There is also duplication of work in several laboratories because of a lack of awareness of research in progress elsewhere in the country.

Publications indexed here are those on food, nutrition and on the relationship between nutrition and health, agriculture, economics and education, and on food and nutrition policy planning, by Sri Lankans and non-Sri Lankans working in Sri Lanka, and by Sri Lankans on research done outside Sri Lanka.

## ARRANGEMENT

The bibliography consists of a subject section and an author index. Under each subject heading entries are listed in chronological order according to the year of publication. Subject indexing has been done according to title and, in some cases, after examination of the text. References have been listed under broad headings as far as possible.

The bibliographical elements included in each entry are listed in the following order :

For books, monographs, reports :

author, title of publication, place of publication, publisher, year of publication, pagination.

For periodical articles:

author, title of article, journal title or abbreviation, volume number, year, pagination.

A few entries have been incorporated without complete information on pagination.

## METHOD

All available medical periodicals and non-medical science periodicals have been indexed. References were obtained by scanning publications, by requesting lists of publications from researchers and from the existing bibliographies on medical science.

Only full length publications have been indexed, abstracts of communications to learned societies and references to presentations at meetings and seminars (without subsequent publication of the paper), and newspaper articles, being excluded.

The following bibliographies have been consulted :

- (1) Selected bibliography of literature on family health education and health behaviour in Sri Lanka, compiled by The Library Documentation Division, National Science Council of Sri Lanka, in collaboration with the Health Education and Publicity Bureau, Ministry of Health, June, 1974.
- (2) Bibliography of scientific literature relating to Sri Lanka, First supplement, compiled by N A W A T Alwis.  
Colombo : Social Science Research Centre,  
National Science Council of Sri Lanka, 1979
- (3) Bibliography on the Sri Lanka Child, compiled by Manil Silva.  
Colombo : Sri Lanka IYC Secretariat, 1979
- (4) Bibliography of medical publications relating to Sri Lanka, 1811—1976. compiled by Kamalika Peiris and C G Uragoda.  
Colombo : Social Science Research Centre, National Science Council of Sri Lanka 1980
- (5) Food consumption and nutritional status in Sri Lanka :—  
A selected bibliography,  
compiled by the Marga Institute.  
Marga Vol. 6 (4) 1982 100—108
- (6) A Bibliography on health in Sri Lanka, 1977—1980  
compiled by Kamalika Peiris and C G Uragoda  
Colombo : Ceylon College of Physicians, 1983
- (7) A bibliography of research, Faculty of Medicine, Peradeniya, 1962—1987,  
compiled by Lakshman Karaliedde, December, 1987
- (8) Annotated bibliography on children and women in Sri Lanka, Volume 1,  
compiled by the Marga Institute and UNICEF, Colombo, 1987.
- (9) Sri Lanka's health care research 1982—1987.  
compiled by S R Korale and R Gunawardena,  
Colombo : Hellis Focal Point, Medical Library.  
University of Colombo, 1988.
