PREFACE

The first edition of the *Current List of Scientific & Technical Periodicals in Libraries in Sri Lanka* was published in 1998 covering periodical titles received in major Science & Technology related libraries in the country during year 1998. The second edition came into light in 2005.

The current publication is an update to the second edition & covers periodical titles received in forty seven S & T related Libraries during year 2007. The *publication* is intended to serve as a tool for the location of periodical titles received in local S & T libraries during year 2007 and to promote exchange of scientific literature among scientists catering to their information needs. Further, it is intended to optimize the limited financial resources by preventing unnecessary duplication of serials within the country while at the same time ensuring the availability of the most important journal titles in the country. The address of each participating library with complete contact details are given at the end of the publication for easy document exchange.

The web version of this publication is accessible at the National Science Library & Resource Centre web site (<http://www.nsf.ac.lk/nslrc/clist2007.doc>). It functions as the on-line consortium of printed journals for the year 2007 offering a convenient mechanism for instant on-line ordering of periodical articles from the relevant libraries. Each periodical title is linked to its web site enabling the user to browse through the table of contents. The publication is also available on CD-ROM format.

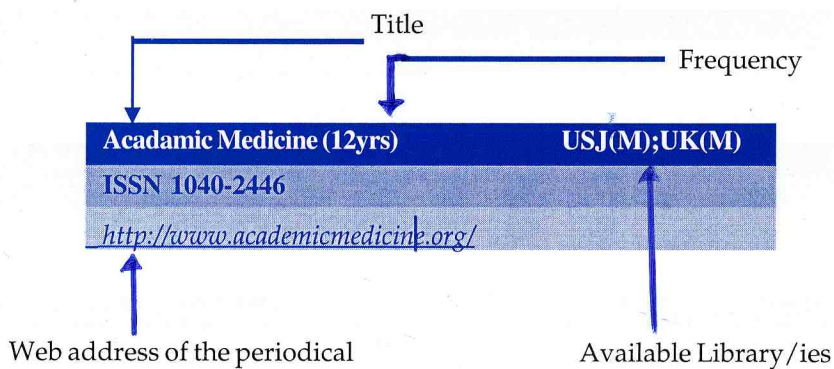

The cooperation extended by the member libraries in making this publication a success is gratefully acknowledged. The patience & the untiring efforts of Ms. Amila Tennakoon & Ms. Hemamali Priyadarshani in the collection of data & the preparation of the publication is very much appreciated. The assistance provided by Ms. Viraji Yasapalitha is also thankfully recorded.

Any comments in view of improving the publication will be very much appreciated.

Sunethra Perera
Head/National Science Library & Resource Centre
National Science Foundation, December 2007

Guide for users

1. Entries are arranged in the alphabetical order of the **periodical titles**.
2. The name/s of the available library/s is/are given against each periodical title in abbreviated form.
3. The typical format of a bibliographic record for a periodical is given below

4. The web address of the periodical is given where on-line version is available.
5. Complete address of each library with full contact details are provided on page 106
