

THE FINAL REPORT OF THE RESEARCH PROJECT - RG/85/B/4

PROJECT TITLE

Cultivation of Baker's yeast and Fodder yeast in Palmyrah  
palm sap and in sugar cane molasses

by

PROF. K. THEIVENDIRARAJAH

May 1986

Department of Botany,  
University of Jaffna,  
Jaffna, Sri Lanka.

LIST OF CONTENTS

1. Acknowledgement	2
2. Abstract	3
3. Chapter I General Introduction	5
4. Chapter 2 Growth medium for culturing yeast	11
5. Chapter 3 Determination of optimum conditions for the cultivation of yeast	17
6. Chapter 4 Yeast yield measurement	54
7. Chapter 5 Protein Estimation of Yeast	73
8. References	79

### ACKNOWLEDGEMENT

I wish to express my sincere thanks to the Director General, Natural Resources, Energy and Science Authority of Sri Lanka for providing the necessary funds for this research project. NARESA fully supported this project including the salary of the research assistant.

I also wish to thank the International Foundation of Science, Sweden for supplying the Gallenkamp Modular Fermentor under a grant for me (581/E) that was used in this present study.

My sincere thanks are due to Miss. E.S. Tambyrajah B.Sc (Jaffna) for assisting me with the experimental work and in the preparation of this report.

My thanks are also due to Miss. A. Vijayarathnam for typing this lengthy report.

Finally I wish to thank the Vice Chancellor, University of Jaffna and Dean, Faculty of Science for their help in promoting this research programme in the Department of Botany, University of Jaffna, Sri Lanka.
